NOTES

- Please notify any changes required to the Central IT Helpdesk on (01942) 404142 (Centrex or Internal 4142)
- Please use the Test System on VC Phone 33000123 or 3000 to test your installation if required
- Numbers in brackets are recorded for the site but for various reasons do not work
- The JVCS Phone number is the official phone number on the Janet Videoconferencing Service. This is an IP connection offering connections to the world wide videoconferencing network free of charge. Use of this requires the site to be registered with JVCS. This is done by the end user in conjunction with Central IT Network Services. The number quoted against the site is prefixed with **0044 02204** to get the unique VC phone number for the system (also known as the E.164 number). It is this full 17-digit number that is registered with JVCS.
- For those interested, the E.164 number is made up of 5 elements, defined for UK schools as follows
 - 0044 International code for UK on world wide VC network
 - 02204 Local area code for Wigan Council VC Gatekeeper
 - 1-digit Category of Site (1 = School, 2 = Museum, 3 = Local Authority, 4 = Adult Learning)
 - 4-digits The particular organisation (site). For a school this is the last 4 digits of the 7-digit DfES number
 - 3-digits The individual VC unit within the organisation (site)

Taking the example of Golborne High School (00440220414022001)

- 0044 International code for UK on world wide VC network
- 02204 Local area code for Wigan Council VC Gatekeeper
- 1 A school
- 4022 Golborne High's DfES number
- 001 The individual VC unit within the school – most only have 1 unit

Within Wigan it is only necessary to use the last 8 digits (14022001) since all our VC units are connected to the same Gatekeeper, just as to use a telephone within Wigan we can use the local 6 digit phone number (eg 404142) rather than the full telephone number (01942 404142 or even +44(0)1942 404142). Outside of Wigan you must quote the full E.164 number for the VC system (00440220414022001), or use the JVCS booking system.
