

Today in class I read a story by Jacqueline Wilson, it is called "Best Friends". I have read other books by Jacqueline Wilson and think she is a great author. This fascinating book is about a two girls who are best friends, but soon they get separated for life! The story was interesting and also interesting is that it didn't have such a happy ending. Finally the two best friends got to see each other again. In my opinion the best part of the story is all the detail and feelings she puts in. The happiest moment for me was when they finally got to see each other again.
